

Rittal – The System.

Faster – better – everywhere.

► Rittal Climate Inspections. 15 minutes can save you thousands.

You know that excessive temperature or overheating in an enclosure is a problem for a number of reasons:

- Excessive heat can affect the proper operation and service life of electrical equipment
- 80% of control component failures are caused by a failing cooling solution
- Unplanned interruptions to production can easily cost your business tens of thousands of dollars per hour

That's why you've installed cooling solutions such as air conditioners, chillers, heat exchangers, fans, or LCPs to manage the heat inside your enclosures.

Now you need to know that those cooling solutions are working properly. Rittal's Climate Inspection Service experts will inventory, document, and evaluate the state of the operating environment.

Temperatures may be rising. Schedule your Rittal Climate Inspection Service today!

As part of the Rittal Climate Inspection Service, a Rittal Service expert will come to your site to inventory, document, and evaluate the state of the operating environment. All enclosure cooling equipment will be checked for cleanliness, function, and serviceability.

Potential information collected includes:

- Unit location and machine number (if applicable)
- Model and serial number
- Manufactured date
- Photo of the unit
- General comments on the condition of the unit
 - Installation condition
 - Grade of dirt
 - Filter condition status
- Set point
- Temperature (ambient and enclosure)
- Alarms noted
- Noise level
- Vibration
- Incoming voltage (if possible)
- Any other general observations

Customer Benefits:

- Provides a solid foundation for any additional work required
- Complete asset list documenting status of each climate control device (including competitor equipment!)
- Ongoing service suggestions and offers tailored to the site

Contact Rittal Services for more information!

Simply give us a call.

Your direct line to our service department is 800 477-4000 (option 3).

You can also send an email (service@rittal.us) or visit our website (rittalenclosures.com/services).
